## Description

lsb-compat - Linux Standard Base Compatibility

Property	Value
Distribution	Debian 9 (Stretch)
Repository	Debian Main amd64
Package filename	lsb-compat_9.20161125_amd64.deb
Package name	lsb-compat
Package version	9.20161125
Package release	-
Package architecture	amd64
Package type	deb
Category	misc
Homepage	http://www.linuxfoundation.org/collaborate/workgroups/lsb
License	-
Maintainer	Debian LSB Team <debian-lsb@lists.debian.org>
Download size	27.63 KB
Installed size	69.00 KB

The Linux Standard Base (<http://www.linuxbase.org/>) was a standard core system that third-party applications written for Linux could depend upon.

This package provides the most minimal layer to be able to install and run selected legacy LSB packages on Debian.

## Alternatives

Package	Version	Architecture	Repository
lsb-compat_9.20161125_i386.deb	9.20161125	i386	Debian Main
lsb-compat	-	-	-

## Requires

Name	Value
cups-filters	>= 1.0.36
ghostscript	-
lib32z1	-
libc6	>= 2.13-17
libc6-i386	-
libc6:i386	-
libcups2	-
libcupsimage2	-

<a href="#">lsb-base</a>	>= 9.20161125
<a href="#">lsb-release</a>	>= 9.20161125
<a href="#">python3:any</a>	>= 3.4~
<a href="#">zlib1g:i386</a>	-

## Provides

Name	Value
lsb	= 4.1
lsb-core	= 4.1

## Conflicts

Name	Value
<a href="#">lsb</a>	-
<a href="#">lsb-core</a>	-

## Replaces

Name	Value
<a href="#">lsb</a>	-
<a href="#">lsb-core</a>	-

## Download

Type	URL
Mirror	ftp.br.debian.org
Binary Package	<a href="#">lsb-compat 9.20161125 amd64.deb</a>
Source Package	lsb

## Install Howto

- Update the package index:

```
# sudo apt-get update
```

- Install lsb-compat deb package:

```
# sudo apt-get install lsb-compat
```

## Changelog

**2016-11-25** – Didier Raboud <odyx@debian.org>  
lsb (9.20161125) unstable; urgency=medium  
[ Didier Raboud ]  
\* Test the distro-info non-Debian fallback, to fix #845489  
\* Also run the tests for all pyversions (Python 2.7 only)  
\* Fix regressions on python2 (Closes: #845489)  
[ Philipp Hahn ]  
\* Strip leading spaces in get\_lsb\_header\_val (Closes: #837639)

**2016-11-01** – Didier Raboud <odyx@debian.org>  
lsb (9.20161101) unstable; urgency=medium  
[ Helmut Grohne ]  
\* Fix FTCBFS: Annotate Build-Depends: python3-all with :any (Closes: #841679)  
\* Add support for DEB\_BUILD\_OPTIONS=nocheck

**2016-10-16** – Didier Raboud <odyx@debian.org>  
lsb (9.20161016) unstable; urgency=medium  
\* Introduce the new lsb-compat package, providing a limited compatibility layer for some selected LSB packages  
– Provides, and replaces lsb & lsb-core  
– Should be sufficient to install and run:  
– Epson printer drivers (LP: #1536353)  
– Google Earth (Closes: #830481)

**2016-06-29** – Didier Raboud <odyx@debian.org>  
lsb (9.20160629) unstable; urgency=medium  
[ Helge Deller ]  
\* Update lsb\_release.py to cope with the new Debian Ports' release label (Closes: #827137)

**2016-06-01** – Didier Raboud <odyx@debian.org>  
lsb (9.20160601) unstable; urgency=medium  
\* Revert "Add 01-upstart-lsb from the upstart package, and make executing rc.d scripts no-op if there is an upstart job for that script" (Closes: #825946)  
\* Bump Standards-Version to 3.9.8 without changes needed

**2016-01-10** – Didier Raboud <odyx@debian.org>  
lsb (9.20160110) unstable; urgency=medium  
\* Merge the last Ubuntu diff  
[ Stéphane Graber & Dimitri John Ledkov ]  
\* Add 01-upstart-lsb from the upstart package, and make executing rc.d scripts no-op if there is an upstart job for that script

**2015-09-17** – Didier Raboud <odyx@debian.org>  
lsb (9.20150917) unstable; urgency=medium  
\* Demote Build-Depends from python3-all-dev to python3-all (Closes: #799210)

**2015-08-26** – Didier Raboud <odyx@debian.org>  
lsb (9.20150826) unstable; urgency=low  
\* Drop all the LSB compatibility packages besides lsb-release and lsb-base  
– Drop packages-availability checking in lsb-release  
– Truncate README.Debian to a minimum  
– Document this in lsb-base.NEWS.Debian  
\* Change the versioning number to avoid any ambiguity; use joeyh's version.date, with version being Debian next stable's

**2015-08-12** – Didier Raboud <odyx@debian.org>  
lsb (4.1+Debian14) unstable; urgency=low  
[ Alexandre Detiste ]  
\* Convert packaging to Debhelper 9  
\* Port to python3, keep compatibility symlink for lsb\_release.py  
(Closes: #719063)  
[ Mert Dirik ]  
\* Add Turkish translation of lsb debconf messages (Closes: #757509)  
[ Didier Raboud ]  
\* Add gbp.conf  
\* Rework the releases codename handling:  
– Depend and Build-Depend on distro-info-data, and populate the RELEASES\_CODENAME\_LOOKUP from that reference  
– Drop meaningless tests trying to compare random release names  
\* Make sure '-proposed-updates' don't sort before unstable  
\* Actuall ignore suites when guessing the release from apt  
\* Fix comparison of testing codename (Closes: #691744)  
\* Bump Standards-Version to 3.9.6 without changes needed

**2014-10-20** – Ondřej Surý <ondrej@debian.org>  
lsb (4.1+Debian13+nmu1) unstable; urgency=medium  
[ Ondřej Surý]  
\* Non-maintainer upload with maintainer agreement  
\* Change libjpeg62 dependency to libjpeg62-turbo (Closes: #766023)
